

## Requirements for Program Completion

### Graduate School of Comprehensive Human Sciences, Degree Programs in Comprehensive Human Sciences (Master's Program)

#### Master's Program in Nursing Science

【Requirements for Program Completion】For students admitted in 2023

		Nursing Science	
Subject area	Group of subjects	Condition or subject name, etc.	Number of credits earned
Subjects related to Nursing Science	Foundation Subjects for Major	Required "Topics in Nursing Science" (2 credits)	8 credits or more
		Graduate General Education courses, Inter-disciplinary Foundation courses, and courses offered by other degree programs in the Graduate School of Comprehensive Human Sciences may be included in the 8 credits. Students must acquire Graduate General Education courses (Introduction to Academic Integrity: 1 credit) and Inter-disciplinary Foundation courses (at least 1 credit).	
	Major Subjects	Including "Topics" (2 credits) and "Seminar" (2 credits) related to each student's research topic from Major Subjects.	8 credits or more
	Common Major Subjects	Required "Research in Nursing Science" (4 credits) Elective required 2 credits from either "Internship" (2 credits) or "Clinical Practicum in Nursing Science" (2 credits)	6 credits
		Number of credits completed	30 credits or more

In the midwifery training program, students must acquire at least 61 credits, including 31 credits required to sit for the national midwifery certification examination. Examination of the results of research on a specific subject and passing the final examination may be substituted for examination of the master's thesis and passing the final examination.

#### 【Graduation requirements】

Students must be enrolled in the program for at least two years, earn the prescribed credits by completing the coursework required for completion as specified by Master's Program in Nursing Science, receive the necessary research guidance, and pass the examination and final examination of their master's thesis or the results of their research on a specific topic. However, for those who have made outstanding achievements, it is sufficient for them to be enrolled for at least one year.

\*If deemed educationally beneficial, credits earned by taking courses in other degree programs may be accepted as credits toward completion within the limit of 10 credits as determined by each degree program.
