(Graduation requirements)

Ph.D student must be enrolled in the program for a minimum of three years, acquire the designated credits specified by this degree program, receive appropriate research guidance, and successfully pass the doctoral thesis review and final defence. Nevertheless, it is acceptable for individuals who have achieved outstanding research outcomes, if their enrollment duration in the program is over a minimum of one year (or three years for those who have completed the master's program ahead of schedule, encompassing the duration of study in the program in Sports Medicine).

(Registration Program)

Ph.D students are required to earn 2 credits of General Foundation Subjects related to Sports Medicine and 3 credits of Major Subjects in Sports Medicine (into which must include "Advanced Study for Sports Medicine Research I " 1 credit). In total, they must accumulate 5 credits or more.

Furthermore, it is recommended that students register subjects of the Graduate General Education Courses and Inter-disciplinary Foundation Courses in addition to the above requirements.
